
SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, DC 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended June 30, 2001

Commission File Number 000-31141

DISCOVERY PARTNERS INTERNATIONAL, INC.

(Exact Name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation
or organization)
9640 Towne Centre Drive
San Diego, California 92121
(Address of principal executive offices and zip code)

33-0655706
(I.R.S. employer
identification number)
(858) 455-8600
(Registrant's telephone number,
including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

As of July 31, 2001 a total of 24,228,692 shares of the Registrant's Common Stock, \$0.001 par value, were issued and outstanding.

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. The condensed consolidated balance sheet as of June 30, 2001, condensed consolidated statements of operations for the three and six months ended June 30, 2001 and 2000, and the condensed consolidated statements of cash flows for the six months ended June 30, 2001 and 2000 are unaudited, but include all adjustments (consisting of normal recurring adjustments) which the Company considers necessary for a fair presentation of the financial position, results of operations and cash flows for the periods presented. The results of operations for the three and six months ended June 30, 2001 shown herein are not necessarily indicative of the results that may be expected for the year ending December 31, 2001. For more complete financial information, these financial statements, and notes thereto, should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2000 included in the Company's Form 10-K filed with the Securities and Exchange Commission.

The consolidated financial statements include all the accounts of the Company and its wholly-owned or majority-owned subsidiaries, IRORI Europe, Ltd., Discovery Technologies Ltd., ChemRx Advanced Technologies, Inc., Structural Proteomics, Inc., Systems Integration Drug Discovery Company, Inc., and Xenometrix, Inc. All intercompany accounts and transactions have been eliminated.

Certain prior period balances have been reclassified to conform to the current period presentation.

2. Net Loss Per Share

Basic and diluted net loss per common share are presented in conformity with SFAS No. 128, *Earnings per Share*, for all periods presented.

In accordance with SFAS No. 128, basic and diluted net loss per share has been computed using the weighted-average number of shares of common stock outstanding during the period, less shares subject to repurchase. Pro forma basic and diluted net loss per common share, as presented in the statement of operations, has been computed for the three and six months ended June 30, 2000 as described above, and also gives effect to the conversion of preferred stock which automatically converted to common stock immediately prior to the completion of the Company's initial public offering on July 27, 2000 (using the "as if converted" method) from the original date of issuance.

The Company has excluded all convertible preferred stock, outstanding stock options and warrants, and shares subject to repurchase from the calculation of diluted net loss per common share because all such securities are anti-dilutive for all applicable periods presented.

[Table of Contents](#)

3. Comprehensive Loss

SFAS No. 130, *Reporting Comprehensive Income*, requires the Company to report, in addition to net loss, comprehensive income (loss) and its components. A summary follows:

Consolidated Statements of Comprehensive Loss
(Unaudited)

	Three months ended		Six months ended	
	June 30, 2001	June 30, 2000	June 30, 2001	June 30, 2000
Comprehensive loss:				
Foreign currency translation adjustment	\$ (147,634)	\$ 67,299	\$ (550,340)	\$ (29,322)

Unrealized gain (loss) on investments	(68,756)	—	(68,756)	—
Net loss	(877,715)	(9,315,111)	(3,088,962)	(10,945,494)
Comprehensive loss	<u>\$(1,094,105)</u>	<u>\$(9,247,812)</u>	<u>\$(3,708,058)</u>	<u>\$(10,974,816)</u>

4. Acquisition of Systems Integration Drug Discovery Company, Inc. and Xenometrix, Inc.

On January 12, 2001, the Company acquired Systems Integration Drug Discovery Company, Inc. (SIDDCO), a privately held company located in Tucson, Arizona, for approximately \$12.5 million. The acquisition was accounted for as a purchase in accordance with the provisions of Accounting Principles Board (“APB”) No. 16, *Business Combinations*.

A summary of the SIDDCO acquisition costs and allocation to the assets acquired and liabilities assumed is as follows:

Total acquisition costs:	
Cash paid at acquisition	\$12,082,171
Acquisition-related expenses	440,293
	<u>\$12,522,464</u>
Allocated to assets and liabilities as follows:	
Tangible assets acquired	\$ 2,226,786
Assumed liabilities	(1,801,245)
Assembled workforce	731,234
Customer contracts	689,000
Goodwill	10,676,689
	<u>\$12,522,464</u>

The goodwill will be amortized over a period of ten years from the date of acquisition. The assembled workforce will be amortized over a period of four years from the date of acquisition. The customer contracts will be amortized over 30 months from the date of acquisition. The pro forma results of operations for the three and six months ended June 30, 2000 as if the acquisition of SIDDCO had occurred on January 1, 2000 are not materially different than the reported net loss.

On May 8, 2001, the Company acquired Xenometrix, Inc. (Xenometrix), a publicly held company located in Boulder, Colorado, for approximately \$2.5 million. The acquisition was accounted for as a purchase in accordance with the provisions of APB No. 16.

[Table of Contents](#)

A summary of the Xenometrix acquisition costs and allocation to the assets acquired and liabilities assumed is as follows:

Total acquisition costs:	
Cash paid at acquisition	\$2,321,416
Acquisition-related expenses	158,568
	<u>\$2,479,984</u>
Allocated to assets and liabilities as follows:	
Tangible assets acquired	\$ 960,154
Assumed liabilities	(923,165)
Patents and license rights	2,442,995
	<u>\$2,479,984</u>

The patents and license rights will be amortized over 10 years from the date of acquisition. The pro forma results of operations for the three and six months ended June 30, 2000 and 2001 as if the acquisition of Xenometrix had occurred on January 1, 2000 are not materially different than the reported net loss.

5. Deferred Stock Compensation

In conjunction with the Company’s initial public offering completed in July 2000, the Company has recorded deferred stock compensation totaling approximately \$2.7 million and \$1.0 million during the years ended December 31, 2000 and 1999, respectively, representing the difference at the date of grant between the exercise or purchase price and estimated fair value of the Company’s common stock as estimated by the Company’s management for financial reporting purposes in accordance with APB No. 25, *Accounting for Stock Issued to Employees*. Deferred

compensation is included as a reduction of stockholders' equity and is being amortized to expense on an accelerated basis in accordance with Financial Accounting Standards Board Interpretation No. 28 over the vesting period of the options and restricted stock. During the three months ended June 30, 2001 and 2000, the Company recorded amortization of stock-based compensation expense of approximately \$275,000 and \$346,000, respectively. During the six months ended June 30, 2001 and 2000, the Company recorded amortization of stock-based compensation expense of approximately \$600,000 and \$610,000, respectively.

6. Related Party Transactions

In April 2001, the Company loaned \$240,000 in total to two officers of the Company pursuant to two promissory notes. The promissory notes mature on April 6, 2006 and bear interest at 5.07% annually. In total, \$36,000 of the borrowings were used by the officers to exercise 90,000 Company stock options at an exercise price of \$0.40 per share. Financial Interpretation No. 44 to APB No. 25 requires that notes issued for the purchase of common stock bear a commercial rate of interest. The effect on compensation expense between the stated rate and the commercial rate is not significant. The promissory notes are full-recourse and also secured by 90,000 shares of the Company's common stock owned by these officers.

7. New Accounting Pronouncements

In July 2001, the Financial Accounting Standards Board (FASB) issued FASB Statements Nos. 141 and 142 (FAS 141 and FAS 142), *Business Combinations* and *Goodwill and Other Intangible Assets*. FAS 141 replaces APB 16 and eliminates pooling-of-interests accounting prospectively. It also provides guidance on purchase accounting related to the recognition of intangible assets and accounting for negative goodwill. FAS 142 changes the accounting for goodwill from an amortization method to an impairment-only approach. Under FAS 142, goodwill will be tested annually and whenever events or circumstances occur indicating that goodwill might be impaired. FAS 141 and FAS 142 are effective for all business combinations completed after June 30, 2001. Upon adoption of FAS 142, amortization of goodwill recorded for business combinations consummated prior to July 1, 2001 will cease, and intangible assets acquired prior to July 1, 2001 that do not meet the criteria for recognition under

[Table of Contents](#)

FAS 141 will be reclassified to goodwill. Companies are required to adopt FAS 142 for fiscal years beginning after December 15, 2001, accordingly, the Company will adopt FAS 142 on January 1, 2002. In connection with the adoption of FAS 142, the Company will be required to perform a transitional goodwill impairment assessment. The Company has not yet determined the impact these standards will have on its results of operations and financial position.

DISCOVERY PARTNERS INTERNATIONAL, INC.

PART I FINANCIAL INFORMATION (continued)

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

THIS FORM 10-Q CONTAINS CERTAIN STATEMENTS THAT ARE NOT STRICTLY HISTORICAL AND ARE "FORWARD-LOOKING" STATEMENTS WITHIN THE MEANING OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995 AND INVOLVE A HIGH DEGREE OF RISK AND UNCERTAINTY. OUR ACTUAL RESULTS MAY DIFFER MATERIALLY FROM THOSE PROJECTED IN THE FORWARD-LOOKING STATEMENTS DUE TO RISKS AND UNCERTAINTIES THAT EXIST IN OUR OPERATIONS, DEVELOPMENT EFFORTS AND BUSINESS ENVIRONMENT, INCLUDING THOSE DESCRIBED BELOW UNDER THE HEADING "RISKS AND UNCERTAINTIES" AND THOSE DESCRIBED IN OUR FORM 10-K FOR THE YEAR ENDED DECEMBER 31, 2000 AND OTHER REPORTS FILED WITH THE SECURITIES AND EXCHANGE COMMISSION.

Overview

We sell a broad range of products and services to pharmaceutical and biotechnology companies to make the drug discovery process for our customers faster, less expensive and more effective at generating drug candidates. We focus on the portion of the drug discovery process that begins after identification of a drug target through when a drug candidate is ready for clinical trials. We develop, produce and sell collections of chemical compounds that pharmaceutical and biotechnology companies test for their potential use as new drugs or for use as the chemical starting point for new drugs. We also develop, manufacture and sell proprietary instruments and the associated line of consumable supplies that are used by the pharmaceutical and biotechnology industries in their own in-house drug discovery chemistry operations. Additionally, we provide testing services to our customers in which chemical compounds are tested for their biological activity as potential drugs. We also provide computational software tools that guide the entire process of chemical compound design, development and testing. Finally, we license our proprietary gene profiling system that characterizes a cell's response upon exposure to compounds and other agents by the pattern of gene expression in the cell.

Results of Operations For The Three Months Ended June 30, 2001 and 2000

Revenue. Total revenues increased 16% from the three months ended June 30, 2000 to the three months ended June 30, 2001. The revenue

growth was primarily due to the acquisition of Systems Integration Drug Discovery Company (completed in January, 2001). The tendency by certain pharmaceutical companies to defer the purchase of big-ticket items such as large libraries of chemical compounds or capital equipment such as our proprietary NanoKan™ System that we noted during the first quarter of 2001 has continued through the second quarter.

Gross margin. Gross margin as a percentage of revenues was 50% for the three months ended June 30, 2000 and for the three months ended June 30, 2001.

Research and development expenses. Research and development expenses consist primarily of salaries and benefits, supplies and expensed development materials, and facilities costs and equipment depreciation. Research and development expenses increased 59% (\$1.1 million) from the three months ended June 30, 2000 to the three months ended June 30, 2001. This increase was primarily due to the research and development expenses associated with the businesses we acquired during the last five quarters.

Selling, general and administrative expenses. Selling, general and administrative expenses consist primarily of salaries and benefits for sales and marketing and administrative personnel, advertising and promotional expenses, professional services, and facilities costs. Selling, general and administrative expenses increased 25% (\$0.5 million) from the three months ended June 30, 2000 to the three months ended June 30, 2001, primarily due to increases in corporate expenses associated with being a public company including directors and officers liability insurance, audit

[Table of Contents](#)

and legal expenses and investor relations expenses and due to the selling, general and administrative expenses related to Systems Integration Drug Discovery Company. These increases were partially offset by cost savings generated by our ChemRx division as we continue to assimilate and integrate Axys Advanced Technologies (acquired in April 2000) with our existing chemistry operation.

Stock-based compensation. During 1999 and 2000, we granted stock options with exercise prices that were less than the estimated fair value of the underlying shares of common stock on the date of grant. As a result, we have recorded deferred stock-based compensation to be amortized over the period during which these options vest. The stock-based compensation expense for the three months ended June 30, 2001 was approximately \$275,000, compared to approximately \$346,000 for the three months ended June 30, 2000.

Amortization of goodwill. We recognized approximately \$1.4 million in goodwill amortization expense for the three months ended June 30, 2001 compared to approximately \$845,000 in goodwill amortization expense recognized during the three months ended June 30, 2000. Goodwill is amortized over ten years. All acquisitions (including those in the first and second quarters of 2001) were accounted for as purchases.

In-Process research and development. We recorded \$9.0 million in expense during the three months ended June 30, 2000 as a result of the write-off of in-process research and development acquired as part of the acquisition of Axys Advanced Technologies.

Interest income. We realized net interest income of approximately \$828,000 for the three months ended June 30, 2001, as compared to net interest income of approximately \$22,000 for the three months ended June 30, 2000. The increase was from the investment of our cash balance remaining from our July/August 2000 initial public offering proceeds.

Results of Operations For The Six Months Ended June 30, 2001 and 2000

Revenue. Total revenues increased 40% from the six months ended June 30, 2000 to the six months ended June 30, 2001. The revenue growth was primarily due to the acquisitions of Axys Advanced Technologies (completed in April, 2000) and Systems Integration Drug Discovery Company (completed in January, 2001) partially offset by a decline in revenue from NanoKan™ System sales. The first half of 2001 has seen certain pharmaceutical companies defer the purchase of big-ticket items such as large libraries of chemical compounds or capital equipment such as our NanoKan System.

Gross margin. Gross margin as a percentage of revenues increased from 47% for the six months ended June 30, 2000 to 52% for the six months ended June 30, 2001. The gross margin improvement resulted from a change in our product mix to include a greater proportion of higher margin compound library revenue, as well as improved margins on our instrumentation product line, the recognition of a nonrefundable prepayment that was earned in the first quarter of 2001 pursuant to the provisions of a chemistry contract, and \$1.0 million earned in June 2001 associated with additional license rights granted to an existing customer.

Research and development expenses. Research and development expenses increased 175% (\$4.4 million) from the six months ended June 30, 2000 to the six months ended June 30, 2001. Research and development expenses increased primarily due to the research and development expenses associated with the businesses we acquired during the last five quarters.

Selling, general and administrative expenses. Selling, general and administrative expenses increased 49% (\$1.8 million) from the six months ended June 30, 2000 to the six months ended June 30, 2001, primarily due to the selling, general and administrative expenses associated with the businesses acquired during the last five quarters and increases in corporate expenses associated with being a public company including directors and officers liability insurance, audit and legal expenses and investor relations expenses.

Stock-based compensation. During 1999 and 2000, we granted stock options with exercise prices that were less than the estimated fair value of the underlying shares of common stock on the date of grant. As a result, we have recorded deferred stock-based compensation to be amortized over the period during which these options vest. The

deferred stock-based compensation expense for the six months ended June 30, 2001 was approximately \$600,000, compared to approximately \$610,000 for the six months ended June 30, 2000.

Amortization of goodwill. We recognized approximately \$2.9 million in goodwill amortization expense for the six months ended June 30, 2001 compared to approximately \$1.0 million in goodwill amortization expense recognized during the six months ended June 30, 2000. Goodwill is amortized over ten years. All acquisitions were accounted for as purchases. The primary reason for the increase is that the first half of 2001 includes two full quarters of amortization of goodwill from the April 2000 acquisition of Axys Advanced Technologies, Inc.

Interest income. We realized net interest income of approximately \$2.0 million for the six months ended June 30, 2001, as compared to net interest expense of approximately \$1.3 million for the six months ended June 30, 2000. Interest earned during the six months ended June 30, 2001 was from the investment of our cash balance remaining from our July/August 2000 initial public offering proceeds. The net interest expense incurred during the six months ended June 30, 2000 was primarily a result of approximately \$1.2 million in imputed interest expense equal to the fair value of warrants that were issued in connection with certain notes payable.

Liquidity and Capital Resources

At June 30, 2001, cash, cash equivalents and short-term investments totaled approximately \$75.6 million, compared to \$97.7 million at December 31, 2000.

Net cash used in operating activities for the six months ended June 30, 2001 was approximately \$4.0 million. A net loss of \$3.1 million, an increase in inventory of \$2.6 million, an increase in accounts receivable of \$800,000 and decreases in accounts payable, accrued expenses and deferred revenue totaling \$4.3 million were partly offset by non-cash charges of \$6.2 million and a decrease in other assets and restricted cash totaling \$600,000.

We currently anticipate investing up to \$2.0 million during the remainder of the year ending December 31, 2001 for leasehold improvements and capital equipment necessary to support future revenue growth. Our actual future capital requirements will depend on a number of factors, including our success in increasing sales of both existing and new products and services, expenses associated with any unforeseen litigation, regulatory changes and competition and technological developments, and potential future merger and acquisition activity. During the six months ended June 30, 2001 we acquired Systems Integration Drug Discovery Company for approximately \$12.0 million net of cash acquired and acquired Xenometrix for approximately \$1.8 million net of cash acquired, paid \$2.0 million cash in prepaid royalties to Abbott Laboratories in connection with an exclusive license to their patented Micro Arrayed Compound Screening technology, and paid \$.9 million cash for the final contingent purchase price payment for Discovery Technologies Ltd.

[Table of Contents](#)

RISKS AND UNCERTAINTIES

In addition to the other information contained herein, you should carefully consider the following risk factors in evaluating our company.

Risks Related To Our Business

We recently have acquired several businesses and face risks associated with integrating these businesses and potential future acquisitions.

We recently completed the acquisitions of Discovery Technologies Limited, Axys Advanced Technologies, 75% of the outstanding stock of Structural Proteomics, Inc., SIDDCO and Xenometrix and are in the process of integrating these businesses. We plan to continue to review potential acquisition candidates in the ordinary course of our business, and our strategy includes building our business through acquisitions. Acquisitions involve numerous risks, including, among others, difficulties and expenses incurred in the consummation of acquisitions and assimilation of the operations, personnel and services or products of the acquired companies, difficulties of operating new businesses, the diversion of management's attention from other business concerns and the potential loss of key employees of the acquired company. For example, distance and cultural differences may make it difficult for us to successfully assimilate the operations of our assay development and high throughput screening operations (Discovery Technologies) located in Switzerland with our medicinal chemistry operations located in San Diego. Further, integrating the chemistry operations performed by AAT and SIDDCO with our existing ChemRx chemistry operations will cause some key employees to have overlapping functional roles, which has led to and may continue to lead to their departures if they are unable or unwilling to assume new or different roles within our merged organization. In addition, acquired businesses may have management structures incompatible with our own and may experience difficulties in maintaining their existing levels of business after joining us. If we do not successfully integrate and grow the five businesses we recently acquired or any businesses we may acquire in the future, our business will suffer. Additionally, acquisition candidates may not be available in the future or may not be available on terms and conditions acceptable to us. Acquisitions of foreign companies also may involve additional risks of assimilating different business practices, overcoming language and cultural barriers and foreign currency translation. We currently have no agreements or commitments with respect to any acquisition, and we may never successfully complete any additional acquisitions.

We may not achieve or sustain profitability in the future.

We are at an early stage of executing our business plan. We have incurred operating and net losses since our inception. As of June 30, 2001, we had an accumulated deficit of \$34.5 million. For the years ended December 31, 1998, 1999, and 2000, and the six months ended June 30, 2001 we had net losses of \$6.3 million, \$3.4 million, \$11.7 million and \$3.1 million, respectively. We may also in the future incur operating and net losses and negative cash flow from operations, due in part to anticipated increases in expenses for research and product development, acquisitions of complementary businesses and technologies and expansion of our sales and marketing capabilities. We may not be able to achieve or maintain profitability. Moreover, if we do achieve profitability, the level of any profitability cannot be predicted and may vary significantly from quarter to quarter.

We may incur exchange losses when foreign currency used in international transactions is converted into U.S. dollars.

Currency fluctuations between the U.S. dollar and the currencies in which we do business including the British pound, the Swiss franc and the Euro will cause foreign currency translation gains and losses. We cannot predict the effects of exchange rate fluctuations on our future operating results because of the number of currencies involved, changes in the percentage of our revenue which will be invoiced in foreign currencies, the variability of currency exposure and the potential volatility of currency exchange rates. We do not currently engage in foreign exchange hedging transactions to manage our foreign currency exposure.

If our products and services do not become widely used in the pharmaceutical and biotechnology industries, it is unlikely that we will be profitable.

[Table of Contents](#)

We have a limited history of offering our products and services, including our collections of chemical compounds, informatics tools and NanoKan™ System. It is uncertain whether our current customers will continue to use these products and services or whether new customers will use these products and services. In order to be successful, our products and services must meet the requirements of the pharmaceutical and biotechnology industries, and we must convince potential customers to use our products and services instead of competing technologies and offerings. Market acceptance will depend on many factors, including our ability to:

- convince potential customers that our technologies are attractive alternatives to other technologies for drug discovery;
- manufacture products and conduct services in sufficient quantities with acceptable quality and at an acceptable cost;
- convince potential customers to purchase drug discovery products and services from us rather than developing them internally; and
- place and service sufficient quantities of our products.

Because of these and other factors, some of which are beyond our control, our products and services may not gain market acceptance.

We may fail to expand customer relationships through integration of products and services.

We may not be successful in selling our offerings in combination across the range of drug discovery disciplines we serve because integrated combinations of our products and services may not achieve time and cost efficiencies for our customers. In addition, we may not succeed in further integrating our offerings. We may not be able to use existing relationships with customers in individual areas of our business to sell products and services in multiple areas of drug discovery. If we do not achieve integration of our products and services, we may not be able to take advantage of potential revenue opportunities.

Our success will depend on our ability to manage rapid growth and expansion.

Growth in our operations has placed and, if we grow in the future, will continue to place a significant strain on our operational, human and financial resources. We recently have acquired five new businesses, and we intend to continue to grow our business internally and by acquisition. In the past we have not fully expanded our management and infrastructure to accommodate all of our past acquisitions in advance of anticipated growth. Therefore, as we expand our operations we will not necessarily have in place infrastructure and personnel sufficient to accommodate the increased size of our business. Our ability to manage effectively any growth through acquisitions or any internal growth will depend, in large part, on our ability to hire, train and assimilate additional management, professional, scientific and technical personnel and our ability to expand, improve and effectively use our operating, management, marketing and financial systems to accommodate our expanded operations. These tasks are made more difficult as we acquire businesses in geographically disparate locations, such as our recent acquisitions of Discovery Technologies in Switzerland, AAT in the San Francisco area, Structural Proteomics in New Jersey, SIDDCO in Tucson, Arizona and Xenometrix in Boulder, Colorado.

[Table of Contents](#)

Our Directed Sorting products and our large compound libraries have lengthy sales cycles, which could cause our operating results to fluctuate significantly from quarter to quarter.

Sales of our Directed Sorting products and our large compound libraries typically involve significant technical evaluation and commitment of capital by our customers. Accordingly, the sales cycles, or the time from finding a prospective customer through closing the sale, associated with these products, range from six to eighteen months. Sales of these products are subject to a number of significant risks, including customers' budgetary constraints and internal acceptance reviews that are beyond our control. Due to these lengthy and unpredictable sales cycles, our operating results could fluctuate significantly from quarter to quarter. We expect to continue to experience significant fluctuations in quarterly operating results due to a variety of factors, such as general and industry specific economic conditions, that may affect the research and development expenditures of pharmaceutical and biotechnology companies.

A large portion of our expenses, including expenses for facilities, equipment and personnel, is relatively fixed. Accordingly, if revenues decline or do not grow as anticipated, we might not be able to correspondingly reduce our operating expenses. Failure to achieve anticipated levels of revenues could therefore significantly harm our operating results for a particular fiscal period.

Due to the possibility of fluctuations in our revenues (on an absolute basis and relative to our expenses), we believe that quarter-to-quarter comparisons of our operating results are not a good indication of our future performance.

We depend on third-party products and services and sole or limited sources of supply to manufacture some components of our Directed Sorting products.

We rely on outside vendors to manufacture components and subassemblies used in our Directed Sorting products. Some of these components and subassemblies are obtained from a single supplier or a limited group of suppliers. We depend on sole-source suppliers for the mesh component of our reactors, the radio frequency, or RF tags used in our commercial products and the two-dimensional bar code tags used in our NanoKan System. These materials are obtained from suppliers on standard commercial terms, and we do not have long-term supply agreements with any of these suppliers. Our reliance on outside vendors generally, and a sole or limited group of suppliers in particular, involves several risks, including:

- the inability to obtain an adequate supply of required components in the event of manufacturing capacity constraints, a discontinuance of a product by a third-party manufacturer or other supply constraints;
- reduced control over quality and pricing of components; and
- delays and long lead times in receiving materials from vendors.

We face restrictions on our ability to sell our NanoKan System to additional customers.

We have delivered and installed our NanoKan System for Aventis and Bristol-Myers Squibb. Under agreements with Aventis and Bristol-Myers Squibb, we are prohibited from delivering the NanoKan System to any additional customers until October 6, 2001.

Our customers may restrict our use of scientific information, which could prevent us from using this information for additional revenue.

We plan to generate and use information that is not proprietary to our customers and that we derive from performing drug discovery services for our customers. However, our customers may not allow us to use for our own purposes information such as the general interaction between types of chemistries and types of drug targets that we generate when performing drug discovery services for them. Our current contracts restrict our use of scientific information we generate for our customers, such as the biological activity of chemical compounds with respect to

[Table of Contents](#)

drug targets, and future contracts also may restrict our use of scientific information. To the extent that our use of information is restricted, we may not be able to collect and aggregate scientific data and take advantage of potential revenue opportunities.

Our operations could be interrupted by damage to our facilities.

Our results of operations are dependent upon the continued use of our highly specialized laboratories and equipment. Our operations are primarily concentrated in facilities in San Diego, California, near San Francisco, California, near Basel, Switzerland, in Tucson, Arizona and in Boulder, Colorado. Natural disasters, such as earthquakes, could damage our laboratories or equipment and these events may materially interrupt our business. We maintain business interruption insurance to cover lost revenues caused by such occurrences. However, this insurance would not compensate us for the loss of opportunity and potential adverse impact on relations with existing customers created by an inability to meet our customers' needs in a timely manner.

Energy shortages may adversely impact operations.

California is currently experiencing shortages of electrical power and other energy sources. This condition has periodically resulted in rolling blackouts, or the temporary and generally unannounced loss of the primary electrical power source. Our laboratory and other facilities in San Diego and South San Francisco are powered by electricity. Currently, we do not have secondary electrical power sources to mitigate the impacts of temporary or longer-term electrical outages. It is not anticipated that the power shortages will abate soon, and therefore, our operating facilities may experience brownouts, blackouts, or other consequences of the shortages, and may be subject to usage restrictions or other energy consumption regulations that could adversely impact or disrupt our research and development, manufacturing and other activities.

Risks Related to Operating in Our Industry

The concentration of the pharmaceutical industry and the current trend toward increasing consolidation could hurt our business prospects.

The market for our products and services is highly concentrated, with approximately 50 large pharmaceutical companies conducting drug discovery research. The continuation of the current trend toward consolidation of the pharmaceutical industry may reduce the number of our potential customers even further. Accordingly, we expect that a relatively small number of customers will account for a substantial portion of our revenues.

Additional risks associated with a highly concentrated customer base include:

- fewer customers for our products and services;
- larger companies may develop in-house technology and expertise rather than using our products and services;
- larger customers may negotiate price discounts or other terms for our products and services that are unfavorable to us; and

- the market for our products and services may become saturated.

For example, because of the heavy concentration of the pharmaceutical industry and the high cost of our NanoKan System, we expect to sell only a small number of NanoKan Systems before we saturate the market for this product. When we are no longer able to sell additional NanoKan Systems, we will be dependent upon the sale of consumables for revenue from this product line. Similarly, there are signs that the market for our AutoSort System is becoming saturated.

[Table of Contents](#)

Our success will depend on the prospects of the pharmaceutical and biotechnology industries and the extent to which these industries use third-party assistance with one or more aspects of their drug discovery process.

Our revenues depend to a large extent on research and development expenditures by the pharmaceutical, biotechnology and agricultural industries and companies in these industries outsourcing research and development projects. These expenditures are based on a wide variety of factors, including the resources available for purchasing research equipment, the spending priorities among various types of research and policies regarding expenditures during recessionary periods. General economic downturns in our customers' industries or any decrease in research and development expenditures could harm our operations. Any decrease in drug discovery spending by pharmaceutical and biotechnology companies could cause our revenues to decline and adversely impact our profitability.

The drug discovery industry is competitive and subject to technological change, and we may not have the resources necessary to compete successfully.

We compete with companies in the United States and abroad that engage in the development and production of drug discovery products and services. These competitors include companies engaged in the following areas of drug discovery:

- Assay, development and screening, including Aurora Biosciences (acquired by Vertex) and Pharmacopeia;
- Combinatorial chemistry instruments, including Argonaut and Bohdan;
- Compound libraries and lead optimization, including Albany Molecular Research and Arqule;
- Informatics, including the MSI division of Pharmacopeia; and
- Gene Profiling, including Phase-1 Molecular Toxicology and Gene Logic.

Academic institutions, governmental agencies and other research organizations also conduct research in areas in which we provide services, either on their own or through collaborative efforts. Also, essentially all of our pharmaceutical company customers have internal departments which provide some of the products and services which we sell, so these customers may have limited needs for our products and services. Many of our competitors including Pharmacopeia have access to greater financial, technical, research, marketing, sales, distribution, service and other resources than we do.

Moreover, the pharmaceutical and biotechnology industries are characterized by continuous technological innovation. We anticipate that we will face increased competition in the future as new companies enter the market and our competitors make advanced technologies available. Technological advances or entirely different approaches that we or one or more of our competitors develop may render our products, services and expertise obsolete or uneconomical. For example, advances in informatics and virtual screening may render some of our technologies, such as our large compound libraries, obsolete. Additionally, the existing approaches of our competitors or new approaches or technologies that our competitors develop may be more effective than those we develop. We may not be able to compete successfully with existing or future competitors.

Our success will depend on our ability to attract and retain key executives, and experienced scientists and sales personnel.

Our future success will depend to a significant extent on our ability to attract, retain and motivate highly skilled scientists and sales personnel. In addition, our business would be significantly harmed if we lost the services of Riccardo Pigliucci, our chief executive officer, or David Coffen, our chief scientific officer. Our ability to maintain, expand or renew existing engagements with our customers, enter into new engagements and provide additional services to our existing customers depends, in large part, on our ability to hire and retain scientists with the skills necessary to keep pace with continuing changes in drug discovery technologies and sales personnel who are highly motivated. Additionally, it is difficult for us to find qualified sales personnel in light of the fact that our sales

[Table of Contents](#)

personnel generally hold PhD's. Our employees are "at will," which means that they may resign at any time, and we may dismiss them at any time. We believe that there is a shortage of, and significant competition for, scientists with the skills and experience in the sciences necessary to perform the services we offer. We compete with pharmaceutical companies, biotechnology companies, combinatorial chemistry and other "tools" companies, contract research companies and academic institutions for new personnel. In addition, our inability to hire additional qualified personnel may require an increase in the workload for both existing and new personnel. We may not be successful in attracting new scientists or sales

personnel or in retaining or motivating our existing personnel.

The intellectual property rights we rely on to protect the technology underlying our products and techniques may not be adequate, which could enable third parties to use our technology or very similar technology and could reduce our ability to compete in the market.

Our success will depend on our ability to obtain, protect and enforce patents on our technology and to protect our trade secrets. We also depend, in part, on patent rights that third parties license to us. Any patents we own or license may not afford meaningful protection for our technology and products. Other companies may challenge our patents or the patents of our licensors and, as a result, these patents could be narrowed, invalidated or rendered unenforceable. In addition, current and future patent applications on which we depend may not result in the issuance of patents in the United States or foreign countries. Competitors may develop products similar to ours which are not covered by our patents. Further, since there is a substantial backlog of patent applications at the U.S. Patent and Trademark Office, the approval or rejection of our or our competitors' patent applications may take several years.

In addition to patent protection, we also rely on copyright protection, trade secrets, know-how, continuing technological innovation and licensing opportunities. In an effort to maintain the confidentiality and ownership of our trade secrets and proprietary information, we require our employees, consultants and advisors to execute confidentiality and proprietary information agreements. However, these agreements may not provide us with adequate protection against improper use or disclosure of confidential information, and there may not be adequate remedies in the event of unauthorized use or disclosure. Furthermore, like many technology companies, we may from time to time hire scientific personnel formerly employed by other companies involved in one or more areas similar to the activities conducted by us. In some situations, our confidentiality and proprietary information agreements may conflict with, or be subject to, the rights of third parties with whom our employees, consultants or advisors have prior employment or consulting relationships. Although we require our employees and consultants to maintain the confidentiality of all confidential information of previous employers, their prior affiliations may subject us or these individuals to allegations of trade secret misappropriation or other similar claims. Finally, others may independently develop substantially equivalent proprietary information and techniques, or otherwise gain access to our trade secrets. Our failure to protect our proprietary information and techniques may inhibit or limit our ability to exclude certain competitors from the market.

The drug discovery industry has a history of intellectual property litigation and we may be involved in intellectual property lawsuits, which may be expensive.

In order to protect or enforce our patent rights, we may have to initiate legal proceedings against third parties. In addition, others may sue us for infringing their intellectual property rights, or we may find it necessary to initiate a lawsuit seeking a declaration from a court that we are not infringing the proprietary rights of others. The patent positions of pharmaceutical, biotechnology and drug discovery companies are generally uncertain. A number of pharmaceutical companies, biotechnology companies, independent researchers, universities and research institutions may have filed patent applications or may have been granted patents that cover technologies similar to the technologies owned by, or licensed to, us or our collaborators. A number of patents may have been issued or may be issued in the future that could cover certain aspects of our technology and that could prevent us from using technology that we use or expect to use. In addition, we are unable to determine all of the patents or patent applications that may materially affect our ability to make, use or sell any potential products. Legal proceedings relating to intellectual property would be expensive, take significant time and divert management's attention from other business concerns, no matter whether we win or lose. The cost of such litigation could affect our profitability.

Further, an unfavorable judgment in an infringement lawsuit brought against us, in addition to any damages we might have to pay, could require us to stop the infringing activity or obtain a license. Any required license may not

[Table of Contents](#)

be available to us on acceptable terms, or at all. In addition, some licenses may be nonexclusive, and therefore, our competitors may have access to the same technology that is licensed to us. If we fail to obtain a required license or are unable to design around a patent, we may be unable to sell some of our products or services.

We may be subject to liability regarding hazardous materials.

Our products and services as well as our research and development processes involve the controlled use of hazardous materials. For example, we sometimes use acids, bases, oxidants, and flammable materials. Acids include trifluoroacetic acid and hydrochloric acid, bases include sodium hydroxide and triethylamine, oxidants include peracids and potassium permanganate, and flammable solvents include methanol, hexane and tetrahydrofuran. We are subject to federal, state and local laws and regulations governing the use, manufacture, storage, handling and disposal of such materials and certain waste products. We cannot completely eliminate the risk of accidental contamination or injury from these materials. In the event of such an accident, we could be held liable for any damages that result, and any such liability could exceed our resources and disrupt our business. In addition, we may have to incur significant costs to comply with environmental laws and regulations related to the handling or disposal of such materials or waste products in the future, which would require us to spend substantial amounts of money.

Other Risks and Uncertainties

Our stock price likely will be volatile.

The trading price of our common stock likely will be volatile and could be subject to fluctuations in price in response to various factors, many of which are beyond our control, including:

- actual or anticipated variations in quarterly operating results;
- announcements of technological innovations by us or our competitors;
- new products or services introduced or announced by us or our competitors;

- changes in financial estimates by securities analysts;
- conditions or trends in the pharmaceutical and biotechnology industries or in the drug discovery “tools” industry;
- announcements by us or our competitors of significant acquisitions, strategic partnerships, joint ventures or capital commitments;
- additions or departures of key personnel;
- economic and political factors; and
- sales of our common stock.

In addition, price and volume fluctuations in the stock market in general, and the Nasdaq National Market and the market for technology companies in particular, have often been unrelated or disproportionate to the operating performance of those companies. Further, the market prices of securities of life sciences companies have been particularly volatile. Conditions or trends in the pharmaceutical and biotechnology industries generally may cause further volatility in the trading price of our common stock, because the market may incorrectly perceive us as a pharmaceutical or biotechnology company. These broad market and industry factors may harm the market price of our common stock, regardless of our operating performance. In the past, plaintiffs have often instituted securities class action litigation following periods of volatility in the market price of a company’s securities. A securities class action suit against us could result in potential liabilities, substantial costs and the diversion of management’s attention and resources, regardless of whether we win or lose.

[Table of Contents](#)

Our executive officers, directors and principal stockholders own a large percentage of our voting stock and could delay or prevent a change in our corporate control or other matters requiring stockholder approval, even if favored by our other stockholders.

As of June 30, 2001, our executive officers, directors and principal stockholders, and their respective affiliates, beneficially own approximately 45.5% of our outstanding common stock. These stockholders, if acting together, might be able to control matters requiring approval by our stockholders, including the election of all directors and approval of significant corporate transactions.

In addition, we have agreed to include, as director nominees, a number of nominees of Axys Pharmaceuticals, Inc. which is proportionate to Axys’ percentage ownership of our shares. Axys, which owns approximately 30.5% of our common stock, currently has the right to nominate for election two of seven directors, and Axys has agreed to vote all of its stock in favor of management’s annual slates of director nominees.

Axys has agreed to be acquired by Celera Genomics Group, a business unit of Applera Corporation. Although Celera will be subject to our standstill and governance agreements with Axys, there is no certainty that our relationship with Celera will be satisfactory.

Because it is unlikely that we will pay dividends, our stockholders will only be able to benefit from holding our stock if the stock price appreciates.

We have never paid cash dividends on our capital stock and do not anticipate paying any cash dividends in the foreseeable future.

Anti-takeover provisions in our charter and bylaws could make a third-party acquisition of us difficult.

Our certificate of incorporation and bylaws contain provisions that could make it more difficult for a third party to acquire us, even if doing so would be beneficial to our stockholders. These provisions could limit the price that investors might be willing to pay in the future for shares of our common stock. In addition, we have a standstill agreement with Axys which prevents Axys from making a hostile effort to acquire us.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Short-term investments. Our interest income is sensitive to changes in the general level of U.S. interest rates, particularly since a significant portion of our investments are and will be in short-term marketable securities, U.S. government securities and corporate bonds. Due to the nature and maturity of our short-term investments, we have concluded that there is no material market risk exposure to principal. A 1% change in interest rates would have an annual effect of approximately \$700,000 on our income.

Foreign currency rate fluctuations. The functional currency for the European operations of our IRORI group is the U.S. dollar, and the functional currency for our Discovery Technologies group is the Swiss franc. Our subsidiary accounts are translated from their local currency to the U.S. dollar using the current exchange rate in effect at the balance sheet date for the balance sheet accounts, and using the average exchange rate during the period for revenues and expense accounts. The effects of translation for the European operations of our IRORI group are recorded as foreign currency gains (losses) in the consolidated statement of operations. The effects of translation for our Discovery Technologies group are recorded as a separate component of stockholders’ equity (accumulated other comprehensive income (loss)). Our European subsidiaries conduct their business with customers in local currencies. Exchange gains and losses arising from these transactions are recorded using the actual exchange differences on the date of the transaction. We have not taken any action to reduce our exposure to changes in foreign currency exchange rates, such as options or futures contracts, with respect to transactions with our European subsidiaries or transactions with our worldwide customers. The net tangible assets of our two European subsidiaries combined were \$7.9 million at June 30, 2001. A 1% decrease in the value of the British pound and Swiss franc relative to the U.S. dollar would result in a foreign translation loss of \$79,000.

Inflation. We do not believe that inflation has had a material impact on our business or operating results during the periods presented.

[Table of Contents](#)

**PART II
OTHER INFORMATION**

Item 1. Legal Proceedings

None.

Item 2. Changes in Securities and Use of Proceeds

On August 1, 2000, we closed the sale of 5,000,000 shares of our Common Stock in our initial public offering, and on August 30, 2000 we closed the sale of an additional 750,000 shares of Common Stock pursuant to the exercise of the underwriters' overallotment option in the offering. The shares of Common Stock sold in the offering were registered under the Securities Act of 1933 on a Registration Statement on Form S-1 (Reg. No. 333-36638) that was declared effective by the SEC on July 27, 2000. Since the inception of the public offering, the net offering proceeds have been applied in conformity with our intended use outlined in the prospectus. We used approximately \$12.0 million, net of cash acquired, to acquire SIDDCO in January 2001 and approximately \$1.8 million, net of cash acquired, to acquire Xenometrix in May 2001 and we used \$2.0 million in January 2001 for prepaid royalties under an exclusive license to Abbott Laboratories' Micro Arrayed Compound Screening Technology.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

The Company held its annual meeting of stockholders on May 17, 2001.

The following matters were voted upon at the meeting:

- The stockholders elected two Directors to hold office for a term expiring upon the 2004 Annual Meeting of Stockholders:

Name of Director Elected	Shares Voting in Favor	Shares Withheld
Dieter Hoehn	18,310,200	11,337
Colin Dollery	18,310,200	11,337

The following individuals are continuing directors with terms expiring upon the 2002 Annual Meeting of Stockholders: Andrew E. Senyei and John P. Walker. The following individuals are continuing directors with terms expiring upon the 2003 Annual Meeting of Stockholders: Riccardo Pigliucci, Alan J. Lewis and Harry Hixson.

- The stockholders ratified the appointment of Ernst & Young LLP as the Company's independent auditors for the fiscal year ending December 31, 2001:

	Votes
For	18,284,100
Against	34,800
Abstaining	2,637

Item 5. Other Information

Jack Fitzpatrick, Vice President and Chief Financial Officer, and John Lillig, Chief Technologist, have adopted personal stock selling plans under SEC Rule 10b5-1, in accordance with policy guidelines established by the Company for such plans.

PROMISSORY NOTE

\$130,000.00

San Diego, CA
April 6, 2001

For value received, the undersigned hereby promises to pay to Discovery Partners International, Inc., a Delaware corporation, or order (the "Holder") at 9640 Towne Centre Drive, San Diego, CA 92121, the principal amount of One Hundred Thirty Thousand Dollars (\$130,000.00), plus interest accrued thereon.

This Promissory Note shall bear 5.07 percent simple interest per annum, until due (upon maturity or acceleration), and after it is due (upon maturity or acceleration) shall bear interest at 10 percent per annum, compounded annually.

Accrued interest shall be due and payable on each anniversary of the date of this Promissory Note. All principal and remaining accrued interest shall be due and payable in a lump sum on April 6, 2006.

This Promissory Note may be prepaid at any time, without premium or penalty; provided, that any such prepayment must be of the entire principal amount plus all accrued interest.

Upon the happening of any of the following events, Holder may, at its option, declare immediately due and payable the entire unpaid principal amount of this Promissory Note, together with all interest thereon, plus any other amounts payable at the time of such declaration pursuant to this Promissory Note. Such events are the following: (1) the maker of this Promissory Note ("Maker") shall admit in writing his inability to pay his debts as they become due, shall make a general assignment for the benefit of creditors or shall file any petition or action for relief under any bankruptcy, reorganization, insolvency or moratorium law, or any other law or laws for the relief of, or relating to, debtors; or (2) an involuntary petition shall be filed against Maker under any bankruptcy, reorganization, insolvency or moratorium law, or any other law or laws for the relief of, or relating to, debtors unless such petition shall be dismissed or vacated within sixty (60) days of the date thereof; or (3) Maker shall fail to make any payment of interest when due; or (4) Maker's employment with the Holder shall, for any reason whatsoever, cease.

This Promissory Note is secured by a Pledge Agreement of even date herewith. This is a full-recourse Promissory Note. The Holder is not required to proceed first against the Pledge Agreement collateral.

The acceptance by Holder of any payment hereunder which is less than the payment in full of all amounts due and payable at the time of such payment shall not constitute a waiver of the right to accelerate at that time or any subsequent time or nullify any prior acceleration without the express consent of Holder except as and to the extent otherwise provided by law.

The Maker of this Promissory Note waives diligence, presentment, protest and demand and also notice of protest, demand, dishonor and nonpayment of this Promissory Note, and expressly agrees that this Promissory Note, or any payment hereunder, may be extended from time to time and consents to the acceptance of security, if any, or the release of security, if any, from this Promissory Note, all without in any way affecting the liability of the Maker.

The right to plead any and all statutes of limitations as a defense to any demand on this Promissory Note, or any instrument securing this Promissory Note, or any and all obligations or liabilities arising out of or in connection with this Promissory Note, is expressly waived by Maker to the fullest extent permitted by law.

No extension of the time for the payment of this Promissory Note, or any installment hereof, made by agreement by the Holder hereof with any person now

or hereafter liable for the payment of this Promissory Note shall affect the original liability under the terms of this Promissory Note by Maker even if it is not a party to such agreement.

If Holder should institute collection efforts, of any nature whatsoever, to attempt to collect any and all amounts due hereunder upon the default of Maker, Maker shall be liable to pay to Holder immediately and without demand all reasonable costs and expenses of collection incurred by Holder, including without limitation reasonable attorneys fees, whether or not suit or other action or proceeding be instituted and specifically including but not limited to collection efforts that may be made on appeal or through a bankruptcy court, and all such sums shall be fully secured by all instruments, if any, securing this Promissory Note.

The provisions of this Promissory Note are intended by Maker to be severable and divisible and the invalidity or unenforceability of a provision or term herein shall not invalidate or render unenforceable the remainder of this Promissory Note or any part thereof.

This Promissory Note shall be governed by and construed and interpreted in accordance with the internal laws of the State of California.

/s/ JACK FITZPATRICK

Jack Fitzpatrick

3

PLEDGE AGREEMENT

In consideration of the loan which Discovery Partners International, Inc., a California corporation (the "Company") having its principal offices at 9640 Towne Centre Drive, San Diego, CA 92121, has on this day extended to the undersigned Jack Fitzpatrick and as security for the payment of that certain promissory note ("Note") in the principal sum of \$130,000.00 payable to the Company or order which the undersigned has on this day executed to evidence such loan, the undersigned hereby grants the Company a security interest in, and pledges with the Company, the following securities and other property:

(i) 40,000 shares of the Company's Common Stock represented by share certificate no. ____ (the "Shares");

(ii) any and all new, additional or different securities subsequently distributed with respect to the shares identified in (i) above which are to be delivered to and deposited with the Company Secretary pursuant to the requirements of Section 3 of this Agreement:

(iii) any and all other property and money which is delivered to or comes into possession of the Company pursuant to the terms and provisions of this Agreement; and

(iv) the proceeds of any sale, exchange or disposition of the property and securities described in (i), (ii), or (iii) above.

All securities, property and money so assigned, transferred to and pledged with the Company shall be herein referred to as the "Collateral". The Company shall hold the Collateral in accordance with the following terms and provisions:

1. Warranties. The undersigned hereby warrants that the undersigned is the owner of the Collateral and has the right to pledge the Collateral and that the Collateral is free from liens, adverse claims and other security interests (other than the Company's repurchase rights against the Shares).

2. Rights and Powers. The Company may, without obligation to do so, exercise at any time and from time to time one or more of the following rights and powers with respect to any or all of the collateral:

a. accept in its discretion other property of the undersigned in exchange for all or part of the Collateral and release Collateral to the undersigned to the extent necessary to effect such exchange, and in such event the money, property or securities received in the exchange shall be held by the Company as substitute security for the Note and all other indebtedness secured hereunder;

b. perform such acts as are necessary to preserve and protect the Collateral and the rights, powers and remedies granted with respect to such Collateral by this Agreement; and

4

c. receive, endorse and give receipt for, or collect by legal proceedings or otherwise, dividends or other distributions made or paid with respect to the Collateral, provided and only if there exists at the time an outstanding event of default under Section 8 of this Agreement.

Expenses reasonably incurred in the exercise of such rights and powers shall be payable by the undersigned and form part of the indebtedness secured hereunder as provided in Section 10.

So long as there exists no event of default under Section 8 of this Agreement, the undersigned may exercise all shareholder voting rights and be entitled to receive any cash distributions with respect to the Collateral. Accordingly, until such time as an event of default occurs under this Agreement, all shareholder meeting notices and other shareholder materials which the Company receives with respect to the Collateral shall be delivered to the undersigned at the address indicated below.

3. Duty to Deliver. Any Shares and any new, additional or different securities which may now or hereafter become distributable with respect to the Collateral by reason of a stock dividend, stock split or reclassification of the capital stock of the Company or by reason of a merger, consolidation or other reorganization affecting the capital structure of the Company shall, upon receipt by the undersigned, be promptly delivered to and deposited with the Company Secretary as part of the Collateral hereunder. Such securities shall be accompanied by one or more properly endorsed stock power assignments.

4. Care of Collateral. The Company shall exercise reasonable care in the custody and preservation of the Collateral, but shall have no obligation to initiate any action with respect to, or otherwise inform the undersigned of, any conversion, call, exchange right, preemption right, subscription right, purchase offer or other right or privilege relating to or affecting the Collateral. The Company shall have no duty to preserve the rights of the undersigned against adverse claims or to protect the Collateral against the possibility of a decline in market value. The Company shall not be obligated to take any action with respect to the Collateral requested by the undersigned unless the request is made in writing and the Company determines that the requested action will not unreasonably jeopardize the value of the Collateral as security for the Note and other indebtedness secured hereunder.

The Company may at any time deliver all or part of the Collateral to the undersigned, and the receipt thereof by the undersigned shall constitute a complete and full acquittance for the Collateral so delivered. The Company shall accordingly be discharged from any further liability or responsibility for the delivered Collateral.

5. Payment of Taxes and Other Charges. The undersigned shall pay, prior to the delinquency date, all taxes, liens, assessments and other charges against the Collateral, and in the event of the undersigned's failure to do so, the Company may at its election pay any or all of such taxes and charges without contesting the validity of legality thereof. The payments so made shall become part of the indebtedness secured

2

5

hereunder and shall be payable immediately by the undersigned, without demand, and until paid shall bear interest at the same rate as provided for in the Note.

6. Transfer of Collateral. In connection with the transfer or assignment of the Note (whether by negotiation, discount or otherwise), the Company may transfer all or any part of the Collateral, and the transferee shall thereupon succeed to all the rights, powers and remedies granted the Company hereunder with respect to the Collateral so transferred. Upon such transfer, the Company shall be fully discharged from all liability and responsibility for the transferred Collateral.

7. Release of Collateral. Provided all indebtedness secured hereunder shall at the time have been paid in full, any Shares and other Collateral shall be released from pledge and returned to the undersigned.

8. Events of Default. The occurrence of one or more of the following events shall constitute an event of default under this Agreement:

- a. failure of the undersigned to pay when due under the Note (either at scheduled maturity or upon acceleration) any principal or accrued interest;
- b. the occurrence of any event of default specified in the Note;
- c. the failure of the undersigned to perform any obligation imposed upon the undersigned by reason of this Agreement; or
- d. the breach of any warranty of the undersigned contained in this Agreement.

Upon the occurrence of any such event of default, the Company may, at its election, declare the Note and all other indebtedness secured hereunder to become immediately due and payable and may exercise any or all of the rights and remedies granted to a secured party under the provisions of the California Uniform Commercial Code (as now or hereafter in effect), including (without limitation) the power to dispose of the Collateral by public or private sale or to accept the Collateral in full payment of the Note and all other indebtedness secured hereunder. Any proceeds realized from the disposition of the Collateral pursuant to the power of sale hereby granted to the Company shall first be applied to the payment of expenses incurred by the Company in connection with the disposition, and the balance shall be applied to the payment of the Note and any other indebtedness secured hereunder in such order of application as the Company shall deem appropriate. Any surplus proceeds shall be paid over to the undersigned. In the event such proceeds prove insufficient to satisfy all indebtedness secured hereunder, then the undersigned shall be personally liable for the deficiency.

9. Other Remedies. The rights, powers and remedies granted to the Company pursuant to the provisions of this agreement shall be in addition to all rights, powers and remedies granted to the Company under any statute or rule of law. Any forbearance, failure or delay by the Company in exercising any right, power or remedy under this Agreement shall not be deemed to be a waiver of such right, power or remedy.

Any single or partial exercise of any right, power or remedy under this Agreement shall not preclude the further exercise thereof, and every right, power and remedy of the Company under this Agreement shall continue in full force and effect until such right, power or remedy is specifically waived by an instrument executed by the Company.

10. Costs and Expenses. All costs and expenses (including reasonable attorneys' fees) incurred by the Company in the exercise or enforcement of any right, power, or remedy granted it under this Agreement shall become part of the indebtedness secured hereunder and shall be payable immediately by the undersigned, without demand, and until paid shall bear interest at the maximum rate permitted by law.

11. Applicable Law. This Agreement shall be governed by and construed in accordance with the internal laws of the State of California and shall be binding upon the executors, administrators, heirs and assigns of the undersigned.

12. Severability. If any provision of this Agreement is held to be invalid under applicable law, then such provision shall be ineffective only to the extent of such invalidity, and neither the remainder of such provision nor any other provisions of this Agreement shall be affected thereby.

13. Amendment. This Agreement may not be amended except in a writing signed by the undersigned and the Company.

14. Entire Agreement. This Agreement constitutes the entire agreement of the undersigned and the Company with regard to the subject matter hereof, and supersedes all prior or contemporaneous discussions, negotiations, understandings and agreements, whether written or oral.

IN WITNESS WHEREOF, this Pledge Agreement has been executed by the undersigned on this 6th day of April, 2001.

PROMISSORY NOTE

\$110,000.00

San Diego, CA
April 6, 2001

For value received, the undersigned hereby promises to pay to Discovery Partners International, Inc., a Delaware corporation, or order (the "Holder") at 9640 Towne Centre Drive, San Diego, CA 92121, the principal amount of One Hundred Ten Thousand Dollars (\$110,000.00), plus interest accrued thereon.

This Promissory Note shall bear 5.07 percent simple interest per annum, until due (upon maturity or acceleration), and after it is due (upon maturity or acceleration) shall bear interest at 10 percent per annum, compounded annually.

Accrued interest shall be due and payable on each anniversary of the date of this Promissory Note. All principal and remaining accrued interest shall be due and payable in a lump sum on April 6, 2006.

This Promissory Note may be prepaid at any time, without premium or penalty; provided, that any such prepayment must be of the entire principal amount plus all accrued interest.

Upon the happening of any of the following events, Holder may, at its option, declare immediately due and payable the entire unpaid principal amount of this Promissory Note, together with all interest thereon, plus any other amounts payable at the time of such declaration pursuant to this Promissory Note. Such events are the following: (1) the maker of this Promissory Note ("Maker") shall admit in writing his inability to pay his debts as they become due, shall make a general assignment for the benefit of creditors or shall file any petition or action for relief under any bankruptcy, reorganization, insolvency or moratorium law, or any other law or laws for the relief of, or relating to, debtors; or (2) an involuntary petition shall be filed against Maker under any bankruptcy, reorganization, insolvency or moratorium law, or any other law or laws for the relief of, or relating to, debtors unless such petition shall be dismissed or vacated within sixty (60) days of the date thereof; or (3) Maker shall fail to make any payment of interest when due; or (4) Maker's employment with the Holder shall, for any reason whatsoever, cease.

This Promissory Note is secured by a Pledge Agreement of even date herewith. This is a full-recourse Promissory Note. The Holder is not required to proceed first against the Pledge Agreement collateral.

The acceptance by Holder of any payment hereunder which is less than the payment in full of all amounts due and payable at the time of such payment shall not constitute a waiver of the right to accelerate at that time or any subsequent time or nullify any prior acceleration without the express consent of Holder except as and to the extent otherwise provided by law.

The Maker of this Promissory Note waives diligence, presentment, protest and demand and also notice of protest, demand, dishonor and nonpayment of this Promissory Note, and expressly agrees that this Promissory Note, or any payment hereunder, may be extended from time to time and consents to the acceptance of security, if any, or the release of security, if any, from this Promissory Note, all without in any way affecting the liability of the Maker.

The right to plead any and all statutes of limitations as a defense to any demand on this Promissory Note, or any instrument securing this Promissory Note, or any and all obligations or liabilities arising out of or in connection with this Promissory Note, is expressly waived by Maker to the fullest extent permitted by law.

No extension of the time for the payment of this Promissory Note, or any installment hereof, made by agreement by the Holder hereof with any person now or hereafter liable for the payment of this Promissory Note shall affect the

original liability under the terms of this Promissory Note by Maker even if it is not a party to such agreement.

If Holder should institute collection efforts, of any nature whatsoever, to attempt to collect any and all amounts due hereunder upon the default of Maker, Maker shall be liable to pay to Holder immediately and without demand all reasonable costs and expenses of collection incurred by Holder, including without limitation reasonable attorneys fees, whether or not suit or other action or proceeding be instituted and specifically including but not limited to collection efforts that may be made on appeal or through a bankruptcy court, and all such sums shall be fully secured by all instruments, if any, securing this Promissory Note.

The provisions of this Promissory Note are intended by Maker to be severable and divisible and the invalidity or unenforceability of a provision or term herein shall not invalidate or render unenforceable the remainder of this Promissory Note or any part thereof.

This Promissory Note shall be governed by and construed and interpreted in accordance with the internal laws of the State of California.

PLEDGE AGREEMENT

In consideration of the loan which Discovery Partners International, Inc., a California corporation (the "Company") having its principal offices at 9640 Towne Centre Drive, San Diego, CA 92121, has on this day extended to the undersigned Rick Brown and as security for the payment of that certain promissory note ("Note") in the principal sum of \$110,000.00 payable to the Company or order which the undersigned has on this day executed to evidence such loan, the undersigned hereby grants the Company a security interest in, and pledges with the Company, the following securities and other property:

(i) 50,000 shares of the Company's Common Stock represented by share certificate no. ____ (the "Shares");

(ii) any and all new, additional or different securities subsequently distributed with respect to the shares identified in (i) above which are to be delivered to and deposited with the Company Secretary pursuant to the requirements of Section 3 of this Agreement:

(iii) any and all other property and money which is delivered to or comes into possession of the Company pursuant to the terms and provisions of this Agreement; and

(iv) the proceeds of any sale, exchange or disposition of the property and securities described in (i), (ii), or (iii) above.

All securities, property and money so assigned, transferred to and pledged with the Company shall be herein referred to as the "Collateral". The Company shall hold the Collateral in accordance with the following terms and provisions:

1. Warranties. The undersigned hereby warrants that the undersigned is the owner of the Collateral and has the right to pledge the Collateral and that the Collateral is free from liens, adverse claims and other security interests (other than the Company's repurchase rights against the Shares).

2. Rights and Powers. The Company may, without obligation to do so, exercise at any time and from time to time one or more of the following rights and powers with respect to any or all of the collateral:

a. accept in its discretion other property of the undersigned in exchange for all or part of the Collateral and release Collateral to the undersigned to the extent necessary to effect such exchange, and in such event the money, property or securities received in the exchange shall be held by the Company as substitute security for the Note and all other indebtedness secured hereunder;

b. perform such acts as are necessary to preserve and protect the Collateral and the rights, powers and remedies granted with respect to such Collateral by this Agreement; and

4

c. receive, endorse and give receipt for, or collect by legal proceedings or otherwise, dividends or other distributions made or paid with respect to the Collateral, provided and only if there exists at the time an outstanding event of default under Section 8 of this Agreement.

Expenses reasonably incurred in the exercise of such rights and powers shall be payable by the undersigned and form part of the indebtedness secured hereunder as provided in Section 10.

So long as there exists no event of default under Section 8 of this Agreement, the undersigned may exercise all shareholder voting rights and be entitled to receive any cash distributions with respect to the Collateral. Accordingly, until such time as an event of default occurs under this Agreement, all shareholder meeting notices and other shareholder materials which the Company receives with respect to the Collateral shall be delivered to the undersigned at the address indicated below.

3. Duty to Deliver. Any Shares and any new, additional or different securities which may now or hereafter become distributable with respect to the Collateral by reason of a stock dividend, stock split or reclassification of the capital stock of the Company or by reason of a merger, consolidation or other reorganization affecting the capital structure of the Company shall, upon receipt by the undersigned, be promptly delivered to and deposited with the Company Secretary as part of the Collateral hereunder. Such securities shall be accompanied by one or more properly endorsed stock power assignments.

4. Care of Collateral. The Company shall exercise reasonable care in the custody and preservation of the Collateral, but shall have no obligation to initiate any action with respect to, or otherwise inform the undersigned of, any conversion, call, exchange right, preemption right, subscription right, purchase offer or other right or privilege relating to or affecting the Collateral. The Company shall have no duty to preserve the rights of the undersigned against adverse claims or to protect the Collateral against the possibility of a decline in market value. The Company shall not be obligated to take any action with respect to the Collateral requested by the undersigned unless the request is made in writing and the Company determines that the requested action will not unreasonably jeopardize the value of the Collateral as security for the Note and other indebtedness secured hereunder.

The Company may at any time deliver all or part of the Collateral to the undersigned, and the receipt thereof by the undersigned shall constitute a complete and full acquittance for the Collateral so delivered. The Company shall accordingly be discharged from any further liability or responsibility for the delivered Collateral.

5. Payment of Taxes and Other Charges. The undersigned shall pay, prior to the delinquency date, all taxes, liens, assessments and other charges against the Collateral, and in the event of the undersigned's failure to do so, the Company may at its election pay any or all of such taxes and charges without contesting the validity of legality thereof. The payments so made shall become part of the indebtedness secured

2

5

hereunder and shall be payable immediately by the undersigned, without demand,

and until paid shall bear interest at the same rate as provided for in the Note.

6. Transfer of Collateral. In connection with the transfer or assignment of the Note (whether by negotiation, discount or otherwise), the Company may transfer all or any part of the Collateral, and the transferee shall thereupon succeed to all the rights, powers and remedies granted the Company hereunder with respect to the Collateral so transferred. Upon such transfer, the Company shall be fully discharged from all liability and responsibility for the transferred Collateral.

7. Release of Collateral. Provided all indebtedness secured hereunder shall at the time have been paid in full, any Shares and other Collateral shall be released from pledge and returned to the undersigned.

8. Events of Default. The occurrence of one or more of the following events shall constitute an event of default under this Agreement:

- a. failure of the undersigned to pay when due under the Note (either at scheduled maturity or upon acceleration) any principal or accrued interest;
- b. the occurrence of any event of default specified in the Note;
- c. the failure of the undersigned to perform any obligation imposed upon the undersigned by reason of this Agreement; or
- d. the breach of any warranty of the undersigned contained in this Agreement.

Upon the occurrence of any such event of default, the Company may, at its election, declare the Note and all other indebtedness secured hereunder to become immediately due and payable and may exercise any or all of the rights and remedies granted to a secured party under the provisions of the California Uniform Commercial Code (as now or hereafter in effect), including (without limitation) the power to dispose of the Collateral by public or private sale or to accept the Collateral in full payment of the Note and all other indebtedness secured hereunder. Any proceeds realized from the disposition of the Collateral pursuant to the power of sale hereby granted to the Company shall first be applied to the payment of expenses incurred by the Company in connection with the disposition, and the balance shall be applied to the payment of the Note and any other indebtedness secured hereunder in such order of application as the Company shall deem appropriate. Any surplus proceeds shall be paid over to the undersigned. In the event such proceeds prove insufficient to satisfy all indebtedness secured hereunder, then the undersigned shall be personally liable for the deficiency.

9. Other Remedies. The rights, powers and remedies granted to the Company pursuant to the provisions of this agreement shall be in addition to all rights, powers and remedies granted to the Company under any statute or rule of law. Any forbearance, failure or delay by the Company in exercising any right, power or remedy under this Agreement shall not be deemed to be a waiver of such right, power or remedy.

Any single or partial exercise of any right, power or remedy under this Agreement shall not preclude the further exercise thereof, and every right, power and remedy of the Company under this Agreement shall continue in full force and effect until such right, power or remedy is specifically waived by an instrument executed by the Company.

10. Costs and Expenses. All costs and expenses (including reasonable attorneys' fees) incurred by the Company in the exercise or enforcement of any right, power, or remedy granted it under this Agreement shall become part of the indebtedness secured hereunder and shall be payable immediately by the undersigned, without demand, and until paid shall bear interest at the maximum rate permitted by law.

11. Applicable Law. This Agreement shall be governed by and construed in accordance with the internal laws of the State of California and shall be binding upon the executors, administrators, heirs and assigns of the

undersigned.

12. Severability. If any provision of this Agreement is held to be invalid under applicable law, then such provision shall be ineffective only to the extent of such invalidity, and neither the remainder of such provision nor any other provisions of this Agreement shall be affected thereby.

13. Amendment. This Agreement may not be amended except in a writing signed by the undersigned and the Company.

14. Entire Agreement. This Agreement constitutes the entire agreement of the undersigned and the Company with regard to the subject matter hereof, and supersedes all prior or contemporaneous discussions, negotiations, understandings and agreements, whether written or oral.

IN WITNESS WHEREOF, this Pledge Agreement has been executed by the undersigned on this 6th day of April, 2001.
